

# Editor's Notes

## Internet Extras

The four page format of the printed *Counter Point* newsletter occasionally prevents us from including all of the material we have collected. Rather than discard this material, we've instituted this new department ("Editor's Notes"). Editor's Notes will only be available to *Counter Point* subscribers who have opted for Internet *Counter Point* delivery in Adobe portable document format (PDF).

## More On DPFE Sensors

The following photos further illustrate the internal differences between the OE and Wells DPFE sensor designs.

*The original equipment DPFE sensor design exposes the sensor to exhaust gases and contamination, potentially shortening component life.*

*The Wells electronic DPFE sensor design utilizes back side pressure element sensing of exhaust gases to shield the sensing element from these potentially harmful gasses.*
